

Hydar Hafiz bin Hydzelan

Software Engineer — Backend, Cloud & Applied AI

Bangi, Selangor, Malaysia • Kuala Lumpur / Selangor • Available November 2026
shogunix.chan@gmail.com • linkedin.com/in/hydar-hafiz-356128233 • github.com/Hydarhafiz • hydarhafiz.com

PROFESSIONAL SUMMARY

Software engineer with hands-on experience building Python/FastAPI backends, automating Terraform-managed AWS delivery and CI/CD, and developing reliable applied-AI systems with graph retrieval and structured validation. Experienced productionizing early-stage systems for stronger traceability, testability and reliability. AWS Certified Machine Learning Engineer – Associate.

TECHNICAL CAPABILITIES

- Backend:** Python · FastAPI · REST APIs · PostgreSQL · SQL · Async Python · Pytest
- Cloud & DevOps:** AWS · Terraform · Docker · GitHub Actions · OIDC · AWS Systems Manager (SSM) · EC2 / RDS · S3 / CloudFront · Nginx · CI/CD
- Applied AI:** Neo4j · RAG / GraphRAG · LangGraph · LLM Integration · Retrieval Systems · Structured Validation · AI Evaluation · Token & Cost Controls
- Supporting Technologies:** TypeScript · Angular · Ionic · Locust · Git

PROFESSIONAL EXPERIENCE

- Backend Software Developer (Contract) — Aerospace Malaysia Innovation Centre** Nov 2025 – Oct 2026
- Own the backend, database and AWS delivery for SAFAPAC, a deployed-beta sustainable aviation fuel analysis platform developed by AMIC with Airbus; substantially rebuilt and productionized an inherited early-stage implementation.
 - Collaborated with five TEA-SAF researchers and one frontend developer to restructure FastAPI/PostgreSQL schemas and calculation workflows, strengthening formula traceability, validation, testability and documentation for an Airbus internal pilot group.
 - Automated Terraform-managed AWS staging and production delivery with Docker, GHCR and GitHub Actions, using OIDC authentication and SSM execution to keep environments reproducible and reduce configuration drift.
 - For AIRIS, designed AI workload and concurrency tests, analyzed bottlenecks, and authored optimization recommendations for senior developer/project manager review; also supported stakeholder training.

- Web & Mobile Development Intern — PETRONAS Digital Sdn Bhd** Jan 2024 – Aug 2024
- Collaborated in a five-person team on a MEAN/Ionic booking prototype used to introduce new staff and interns to the technology stack.
 - Built Angular data views and paired on Ionic booking, QR check-in, validation, Android deployment and development documentation.

SELECTED PROJECT

- AnotherEdenAI** January 2026 – Present
- Personal project · Active development
- Building an actively developed FastAPI/Neo4j recommendation system with typed graph retrieval, deterministic candidate generation and LangGraph orchestration.
 - Designed structured candidate validation, bounded correction, provider-neutral adapters, token/output limits, usage tracking and a backend fallback to constrain LLM refinement.

EDUCATION

- Bachelor of Computer Science (Hons) — Universiti Teknologi PETRONAS** May 2022 – Aug 2025
- CGPA: 3.51

CERTIFICATIONS

- AWS Certified Machine Learning Engineer – Associate — Mar 2026
- AWS Certified Cloud Practitioner — Sep 2025
- Microsoft Certified: Azure AI Fundamentals — Jun 2025
