

HYDAR HAFIZ BIN HYDZELAN

BACKEND ENGINEER | CLOUD & APPLIED AI

Bangi, Selangor | Available November 2026
shogunix.chan@gmail.com | linkedin.com/in/hydar-hafiz-356128233 | github.com/Hydarhafiz | hydarhafiz.com

SUMMARY

Backend engineer building Python/FastAPI backends, Terraform-managed AWS delivery, and reliability-focused applied-AI systems with graph retrieval and structured validation. Brings a traceability-first approach to API/data design, infrastructure automation, performance testing, and constrained LLM workflows.

TECHNICAL SKILLS

Backend: Python · FastAPI · REST APIs · PostgreSQL · SQL · Pydantic
Cloud & DevOps: AWS · Terraform · Docker · GitHub Actions · OIDC · AWS Systems Manager (SSM) · Linux · Nginx · CI/CD
Applied AI: Neo4j · RAG / GraphRAG · LangGraph · LLM Integration · Retrieval Systems · Structured Validation · AI Evaluation
Supporting Technologies: TypeScript · Angular · Ionic · Node.js · Git

PROFESSIONAL EXPERIENCE

Backend Software Developer (Contract) — Aerospace Malaysia Innovation Centre Nov 2025 – Oct 2026

- Built and evolved **SAFAPAC's Python/FastAPI and PostgreSQL backend and AWS delivery**, moving an incomplete local prototype toward an AWS-hosted internal pilot supporting **6 TEA researchers and 5 Airbus staff**.
- Governed **33,047 defaults across 12 processes, 22 feedstocks and 217 countries** with draft, publish and rollback workflows; refactored a **33-point sensitivity workflow** to prepared inputs and targeted NPV projections at **50 ms p95 across 10 staging acceptance cycles**.
- For **AIRIS**, designed a **6-scenario/10-turn controlled experiment** on RAG workloads that achieved **96.1% less local RAG context**, from **541k to 20.9k local-context tokens**, with **10/10 citation checks passed**; then load-tested vector-search and outbound-LLM bottlenecks for senior review.
- Automated **Terraform-managed AWS delivery** with Docker, GitHub Actions, OIDC and SSM; also hosted **SAF Sky Quest** on Lightsail with Caddy HTTPS, with **29 registration records captured**, runtime-data export and infrastructure decommissioning.

Web & Mobile Development Intern — PETRONAS Digital Sdn Bhd Jan 2024 – Aug 2024

- Worked on Angular floor/desk views and paired on Ionic booking, QR check-in, Android deployment and development documentation within the five-person team.

PERSONAL PROJECT

AnotherEdenAI January 2026 – Present

- Personal project · Active development
- Building a **FastAPI/Neo4j roster-aware recommender** for a live-service JRPG, combining graph retrieval and **deterministic candidate generation** before bounded LLM ranking, refinement and explanation.
 - Verified deterministic feasibility across **31 evaluation cases**, including infeasible cases making zero analyzer calls, with **367/367 legal-kit coverage** for canonical character forms/styles in the accepted portfolio evidence snapshot.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science (Hons) — Universiti Teknologi PETRONAS May 2022 – Aug 2025

CGPA: 3.51
AWS Certified Machine Learning Engineer – Associate (Mar 2026)
AWS Certified Cloud Practitioner (Sep 2025)
Microsoft Certified: Azure AI Fundamentals (Jun 2025)
